Tangent is in active development. You can follow its progress on the Github project or by checking out the active issues.

Here is a glimpse into the current long-term plans for the project.

Soon™

- **Export** notes to html or simplified markdown.
- **Line-Level Queries** – Search for individual lines & todos in your notes.

Later

- **Board-Style Productivity** – Visualize notes on a free-form board, with optional list, table, and swim lane structures.
- **Note refactoring controls** – Extract the context of notes to new or existing notes with robust automation.
- **Tag Parameters** – Add secondary information to your tags.

Much Later

- **View websites & PDFs alongside notes** with optional automatic archiving.
- **iOS & Android** support.

- **Collaborative writing** via shared workspaces.

See something you're excited about? Don't see something you want? Let me know!
